Journal of Applied Pharmaceutical Science (JAPS): A new open-Access international journal in the field of Pharmaceutical Science

Dear Readers,

Welcome to Journal of Applied Pharmaceutical Science (JAPS): An International open access journal. JAPS is a continuous or regular monitoring in the field of pharmaceutical sciences and is a broad multidisciplinary journal which covers all the aspect in the field of pharmaceutical sciences, pharmaceutical technology, nanotechnology, biotechnology and drug regulatory affairs. The motivation for this new journal is to better facilitate a widespread discrimination and understanding of these rapidly growing pharmaceutical sciences and pharmaceutical technology field.

JAPS will provide an interactive source between industry and academic scientists involved in the field of pharmaceutical sciences and hopefully will foster and enhance collaborative efforts. JAPS will exceed the expectations of MediPoeia, to provide a premier journal on a global basis dealing with pharmaceutical development and technology. The journal will focus on the basic and applied research in pharmaceutical sciences. JAPS will provide an ideal platform for all researchers involved in the field of pharmacy to utilize JAPS for their research purpose. Moreover, they will be encouraged for submitting their latest research finding and review topics in the form of written manuscripts in JAPS.

We are very pleased to have very good editorial board and advisory board which provide the JPAS an edge over other journal in the same filed. We invite you to embark on this journey by prompt publication (Mini-reviews, Short communication, original research articles and review articles) in all fields of pharmaceutical sciences. We hope that you will learn as much from this supplement as we did from each other in creating it.

“The man who graduates today and stops learning tomorrow is uneducated the day after”.
