SUPPLEMENTARY MATERIALS

Empirical Antibiotics versus Definitive Antibiotics for Sepsis Patients in Indonesia: A cost-effectiveness analysis

Supplementary 1. Characteristics of 84 patients with sepsis hospitalized at Tabanan Hospital from 2020-2022

Variable (N=84)	Value (%)
<i>Age</i>	
<45	9 (10.7)
45-60	24 (28.6)
61-80	40 (47.6)
>80	11 (13.1)
<i>Gender</i>	

Male	48 (57.1)
------	-----------

Female	36 (42.9)
--------	-----------

Number of patients

Culture-based treatment	13 (15.5)
-------------------------	-----------

Empirical treatment	71 (84.5)
---------------------	-----------

Comorbidities

No comorbidities	8 (9.5)
------------------	---------

1 comorbid	27 (32.1)
------------	-----------

>1 comorbidities	49 (58.3)
------------------	-----------

End outcomes

Die	57 (67.9)
-----	-----------

Survive	27 (32.1)
---------	-----------

N: number of patients
